Sure, Lisa. I appreciate it.
Here's what I'd like to know:

-- Has the EPA noted any changes to wildlife or plants that contact the river? Dead fish, wilting plants?

-- Does the EPA know for certain the plume contains arsenic, lead, zinc, copper, aluminum and cadmium, and does it know what levels these dissolved metals are in the plume? If the EPA doesn't know these questions, when will it?

-- Has the EPA identified any other toxic metals or substances in the plume? Mercury?

-- Has the EPA contained the leaking from the Gold King Mine? If now, how rapidly is it leaking and when will the EPA contain it?

-- Were the contractors EPA was working with at the spill site Environmental Response and Restoration?

Thank you,
- Dan

Thanks, Lisa. Unfortunately I won't be able to make the 3 p.m. call. Could we schedule a phone call at about 1:30 p.m. or 2 p.m.? I know you're swamped with media calls, but I need to keep our community informed.

Thanks again,

- Dan

That's OK, Lisa. I just left you a voice message -- I wanted to touch base with you to see when you expect to have more information regarding the metals in the water. Could you call me when you have a few minutes?

Thanks,

- Dan

Sorry I missed your call.

It was Joan Card, Senior Advisor to the Regional Administrator and Martin Hestmark, Assistant Regional Administrator for Ecosystems Protection and Remediation
